Dear Sir,

**Re; Installation of new drainage easement.**

Many thanks for your letter dated 21<sup>st</sup> March on behalf of my neighbours; Dr Nigel Hall, Mr John McGowan & Mr Graham Jones. In relation to the above – mentioned drainage system I would like to confirm that as a responsible homeowner, I have made alternative arrangements to install a new drainage system on my own property.

As stated in your letter, my property does have its own septic tank; although the existing soak- away currently joins with the neighbours system that is going to be replaced. I am thankful that I have been given permission to continue to use the existing soak- away system until my alternative system is in place.

During the installation of this new drainage system there will be disruption to the driveway Dr Hall as agricultural access to his field. I will of course give prior notice of this work but access may be limited for a short time. I will confirm a date for this works once all is confirmed.

Please pass on my thanks to my neighbours for their consideration in this project.

Yours Faithfully,

Miss Clare Harris
