- 1.02 The Herefordshire Local Plan - Core Strategy shows the following designations for the property/area or specific proposals for the area: HOUSING MARKET AREA (H1, H2, RA1, RA2)
- Herefordshire Council has prepared a Local Plan - Core Strategy for the County to cover the period 2011 - 2031. This document includes a range of county wide policies which provide the framework for development in the County. The Core Strategy Policies replace most of the Unitary Development Plan (UDP) 2007 policies.
- The Local Plan will ultimately be made up of a number of planning documents. A Hereford Area Plan, Neighbourhood Development Plans and other Development Plan Documents will also be prepared in conformity with the Core Strategy and these will provide greater detail about the location of future development. Together all these documents will form the Local Plan for Herefordshire.

Radon gas**Do records indicate that the property is in a "Radon Affected Area" as identified by Public Health England or Public Health Wales?**

3.14 It is in a Radon affected area; between 1% and 10% of homes are estimated to be above the action level (intermediate probability radon area).

What is Radon?

Radon is a naturally occurring gas which is formed by the decay of small amounts of uranium present in all rocks and soils. In the open air radon disperses rapidly and levels are low. However, in buildings such as homes, radon can be drawn in through cracks and gaps in the floor and can in some instances reach unacceptably high concentrations. Exposure to particularly high levels of radon may increase the risk of developing lung cancer.

Radon is measured in Becquerels per cubic metre of air (Bq m⁻³). The average radon level in homes across the UK is 20 Bq m⁻³.

Public Health England advises that homes in radon affected areas should be tested and householders should take action to reduce radon levels if their home has a reading of, or over, 200 Bq m⁻³, (the radon action level).

Radon Affected Areas

Areas of the UK where 1% or more of homes are estimated to exceed the action level are defined as a "radon affected area".

PHE recommends that all parts of the UK should be classified according to the probability that homes in the locality will have an indoor radon concentration above the (200 Bq m⁻³).

Radon potential band (%) General Risk Affected Area?

0 - 1	Low	No	
1 - 3	Medium	Yes	
3 - 5	Medium		Yes
5 - 10	Medium		Yes
10 - 30	High	Yes	
Over 30	High	Yes	

Radon Probability Areas

Areas where the probability of exceeding the Action Level is 1% or more are defined as Radon Affected Areas. To avoid the misconception that radon is only present in radon Affected Areas, those areas with less than 1% probability of exceeding the Action Level are defined as "lower probability areas".

" Areas where less than 1% of homes are estimated to be above the action level are "lower probability radon areas".

" Areas where between 1% and 10% of homes are estimated to be above the action level are "intermediate probability radon areas".

" Areas where at least 10% of homes are estimated to be above the action level are "higher probability radon areas". "

Radon Searches

There are different ways to find the Radon Potential for an address or area of land from the UKradon website).

You can either use a Definitive Search (which use the full radon data set of 25 metre x 25 metre squares) or a Indicative Search (which use data grouped by area or postcode)

" Online Radon Report (Definitive Search)

You can find out if a property is in a radon affected area by purchasing an online radon risk report which costs £3.90 inc. VAT from the PHE radon website; UKradon: (www.ukradon.org).

The report will provide the following:

1. Whether the property is in a Radon Affected Area
2. The estimated probability of the property being above the Action Level for radon.
3. The requirement under Building Regulations for radon protection in new buildings and extensions at the property.
4. PHE guidance for occupiers and prospective purchases

The report will tell you the risk of the chosen address having a high level of radon. NOT the level of radon at that address.

" Indicative Maps (Indicative Search)

View the free UK maps of radon from the UKradon website. These documents show the worst case radon risk for every 1km grid square in the United Kingdom

To view for all the available Radon Searches please visit the UKradon website.

Standard Information/Disclaimer

Addendum

Question 1.1(a)-(i)

Local authority records from 1st August 1977 have been inspected to provide this response. Planning entries prior to this date are available on request from the Planning Department. A fee may be charged for this service.
For any enquiries regarding the planning entries please contact the Planning Desk at the Herefordshire Archive and Records Centre Fir Tree Lane, Rotherwas, Hereford HR2 6LA e-mail planningdesk@herefordshire.gov.uk

Question 1.1(j)

Building Control records are kept in accordance with the Building Control Retention Schedule and destroyed once they are no longer required for the Council's business use, in accordance with appropriate legislation and operational requirements.

From 1st October 2023 the Building Safety Regulator became the Building Control Authority for high-rise buildings.

High-rise buildings are defined as having 7 or more storeys and/or being 18 metres or more high, and either having at least 2 residential units or being hospitals or care homes (during design and construction).

Enquiries should be made with the Building Safety Regulator for answers to questions 1.1j,k & l for applications received on high rise buildings since 1st October 2023.

For further information please visit <https://www.hse.gov.uk/building-safety/regulator.htm> . Information on the Regulator is also available here Building Safety Hub | Building Safety Regulator . You may also wish to make enquiries of developers of new buildings and/or managing agents of existing buildings.

Question 1.1(l)

The local authority may not always be aware of such works and enquiries should also be made of the seller.

Informative: (1) As from April 1st 2002 the installation of a replacement window, rooflight or roof window or specified type of glazed door must either have building regulation approval or be carried out and certified by a person who is registered under the Fenestration Self-Assessment Scheme by the Glass and Glazing Federation.

Please note that following the implementation of a new computer system in Building Control, any applications dated prior to 28th September 2009 have been abbreviated in your search response. They will no longer contain separating slashes or a prefix of BC.

For any enquiries regarding Building Control please contact the Building Control Section, Council Offices, Plough Lane, Hereford. HR4 0LE or e-mail buildingcontrolenquiries@herefordshire.gov.uk

Question 1.2

This reply reflects policies or proposals in any existing development plan and in any formally proposed alteration or replacement plan, but does not include policies contained in planning guidance notes.

Question 2.1

If a road, footway or footpath is not a highway maintained at public expense, there may be no right to use it and the local authority cannot express an opinion without seeing the title plan of the property and carrying out a site inspection.

Question 2.2

Herefordshire Council holds a Definitive Map and Statement of public rights of way with a relevant date of 1st April, 1989. Whilst this does not preclude the existence of unrecorded rights of way, the council is unaware of any claimed rights of way existing over the search site. If in doubt please contact herefordshireprow@bblivingplaces.com for further information.

Question 3

With reference to questions 3.1 to 3.15 matters already entered on the Local Land Charges Register will not be revealed in answer to this enquiry.

3.3 Drainage matters - It was expected that compulsory SuDS would come into force in April 2015 and apply to new build properties built after that date. However, discussions are still continuing in relation to the SuDS regime in England.

Question 3.4

A mini roundabout is a roundabout having a one-way circulatory carriageway around a flush or slightly raised circular marking less than 4 metres in diameter and with or without flared approaches.

Question 3.5

If this property sits near to the local authority boundary, enquirers are therefore advised to seek further information from the neighbouring local authority.

Question 3.6

In some circumstances, road closures can be obtained by third parties from magistrate's courts, or can be made by the Secretary of State for Transport without involving the local authority.

This enquiry is designed to reveal matters that are yet to be implemented and/or could not be ascertained by a visual inspection.

Schemes that have, or are currently being implemented will not be referred to in answer to this enquiry.

If this property sits near to the local authority boundary, enquirers are therefore advised to seek further information from the neighbouring local authority.

Question 3.13

A negative reply does not imply that the property or any adjoining or adjacent land is free from contamination, or from the risk of it, and

the reply may not disclose steps taken by another local authority in whose area adjacent or adjoining land is situated.

Question 3.14

Radon Affected Areas are designated by the National Radiological Protection Board. It is recommended that the level of radon gas should be measured in all properties with Radon Affected Areas. The present owner or (for a new property) the builder should be asked whether protective measures were incorporated in the construction of the property; whether radon levels have been measured in the property; whether the results were at or above the Action Level (prescribed by the NRPB) and if so whether remedial measures were installed and whether the radon levels were re-tested and confirmed the effectiveness of the measures.

CON29 PART 2 Informatives

Question 8

You are advised to seek further information from <http://www.linesearchbeforeudig.co.uk>
LinesearchbeforeUdig (LSBUD) is a free to use internet based enquiry service available 24/7. It provides a single point of contact for all enquiries relating to the apparatus owned and/or operated by the Asset Owners protected by LSBUD, including underground and overhead transmission/distribution electricity networks, transmission/distribution gas networks, oil pipelines, and fibre optic networks.

These replies have been given in accordance with the notes appended to CON29 form.

References to the provisions of particular Acts of Parliament or Regulations include any provisions which they have replaced and also include existing or future amendments or re-enactments.

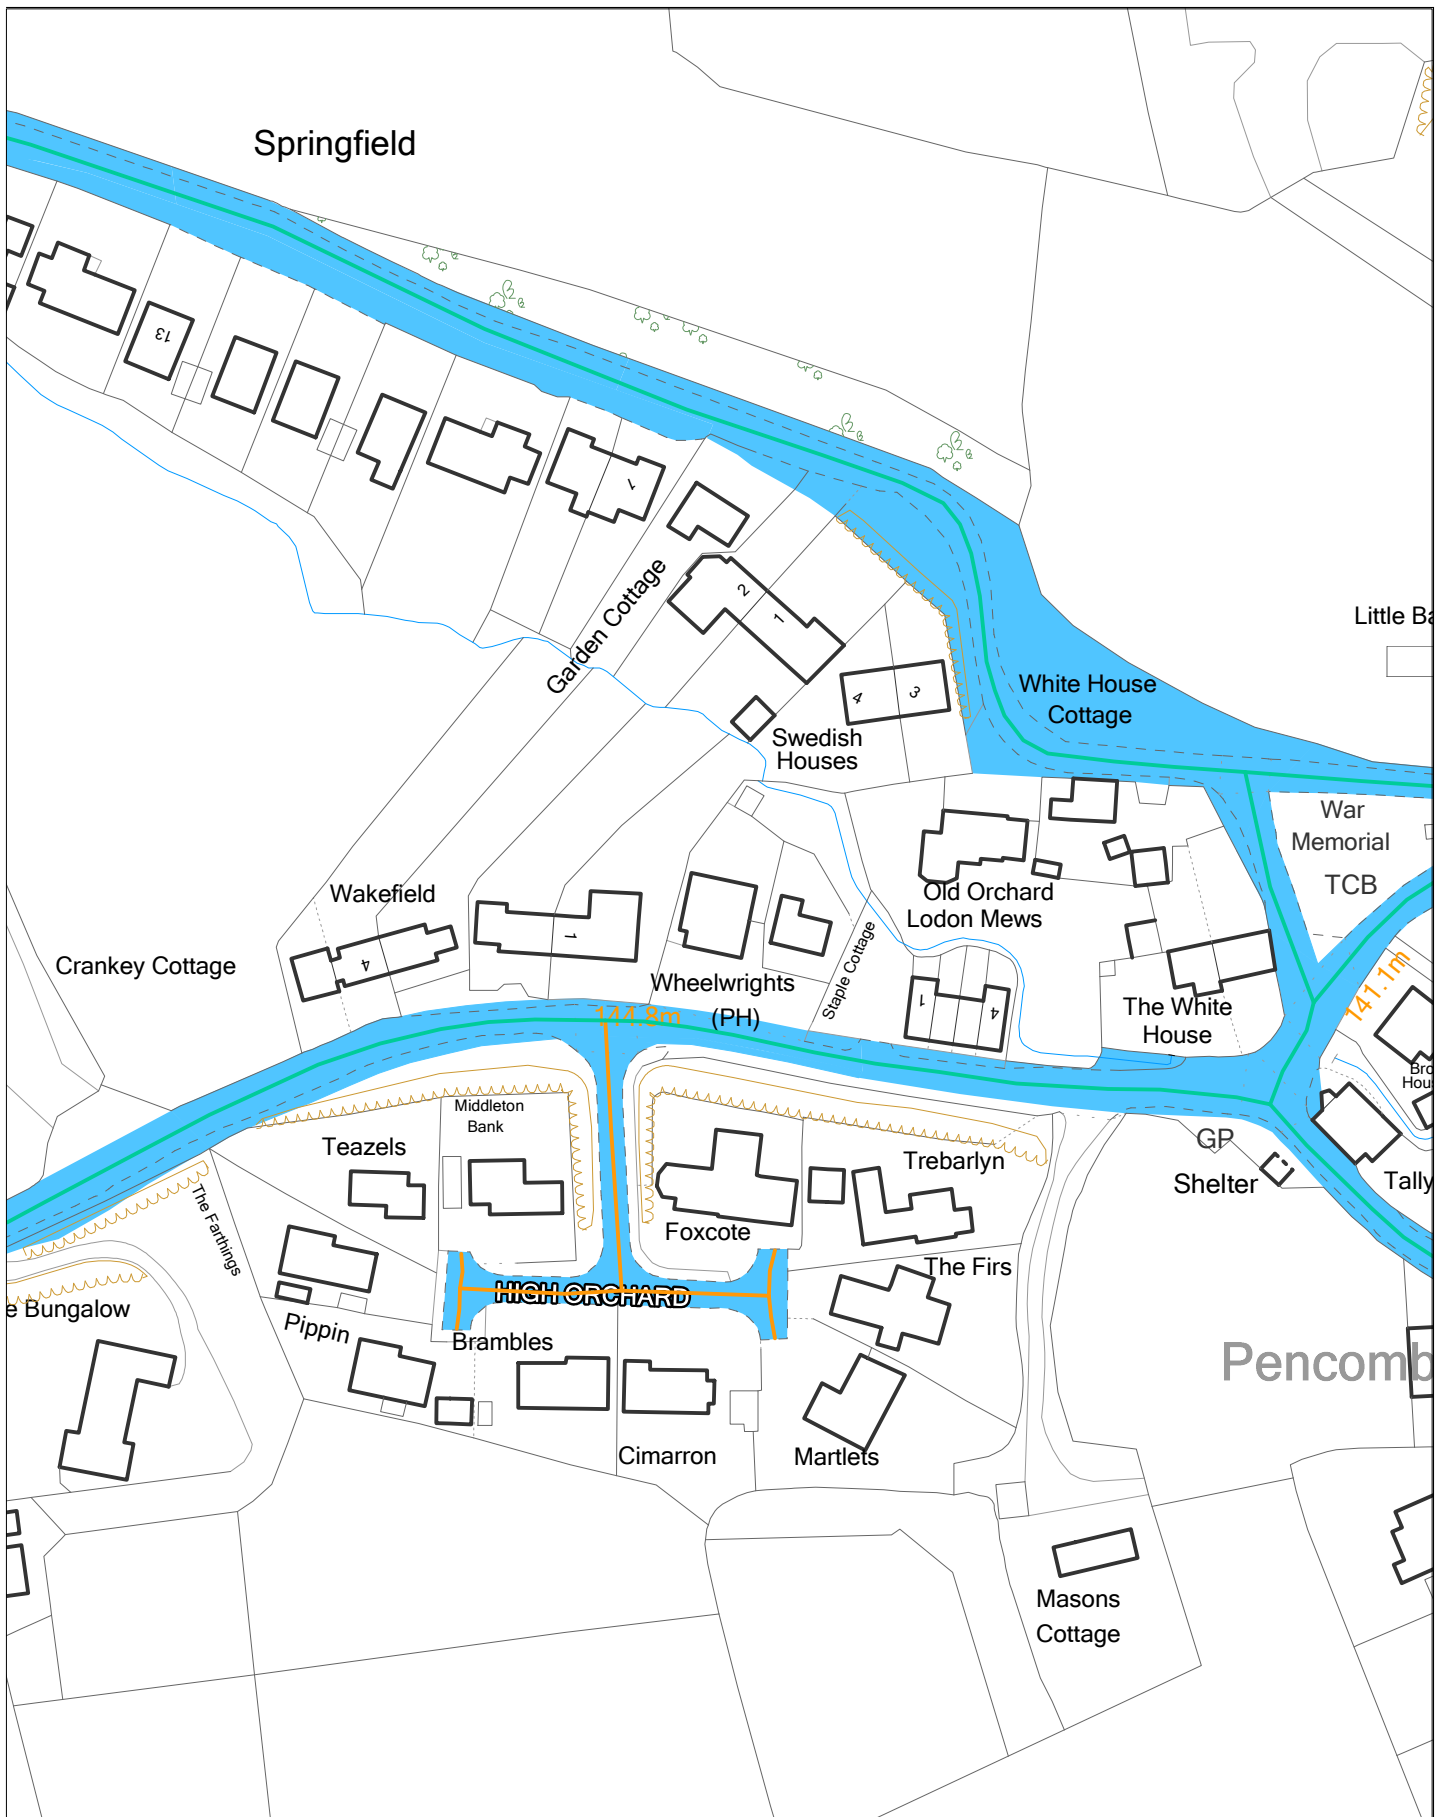

The replies will be given in the belief that they are in accordance with information presently available to the officers of the replying local authority, but none of the local authorities or their officers accepts legal responsibility for an incorrect reply, except for negligence. Any legal responsibility for negligence will be owed to the person who raised the enquiries and the person on whose behalf they were raised. It will also be owed to any other person who has knowledge (personally or through an agent) of the replies before the time when he purchases, takes a tenancy of, or lends money on the security of the property or (if earlier) the time when he becomes contractually bound to do so.

This Form should be read in conjunction with the guidance notes available separately.

Area means any area in which the property is located.

References to the Local Authority include any predecessor Local Authority and also any Local Authority committee, sub-committee or other body or person exercising powers delegated by the Local Authority and their approval includes their decision to proceed. The replies given to certain enquiries cover knowledge and actions of both the District Local Authority and County Local Authority.

Where relevant, the source department for copy documents should be provided.
